Eurofinsa to build the new Swiftair hangar at the Adolfo Suárez Madrid-Barajas Airport

- This new hangar will make it possible for maintenance to be performed on up to four Boeing 737 aircraft at the same time, generating more than 200 new jobs.
- This project includes an aircraft parking apron plus storage and office space.

Madrid, 7 September 2016

Eurofinsa, Spain's leading group of companies in the development of public works, has been selected by the **Swiftair** airline company to build an aircraft maintenance hangar at the Adolfo Suárez Madrid-Barajas Airport.

This project, the works for which will be supervised by the engineering firm Assad Desarrollo, will consist of a hangar totaling 30 meters in height and 6,400 meters of open-bay floor space, making it possible for maintenance to simultaneously be performed on four aircraft. On the exterior, a parking apron and a 2,000 m² building will be built to be used as storage and office space.

The hangar will be outfitted with cutting-edge technology, including the most advanced MRO (Maintenance, Repair and Operations) equipment. All aspects respecting the environment have been taken into account in the hangar's construction, including energy-efficient building construction. The hangar is anticipated to be officially opened for use 14 months immediately following the final approval of the project.

Eurofinsa, www.eurofinsa.com, is a group of companies that specialize in the development of public works and the implementation of construction and equipment projects for public institutions. Eurofinsa provides integral solutions ranging from the engineering, studies, design and construction to the sale, delivery and installation of equipment with the subsequent training, maintenance and operation.

More than 40 years of experience worldwide in the construction field guarantee Eurofinsa's reliability and know-how, enabling it to provide the highest standards of quality in each one of its projects and contribute the development and progress by respecting the environment within a framework of constant innovation.
